RK

SUMMARY

As a passionate MERN Stack Developer, I have hands-on experience in creating full-stack web applications utilizing technologies like MongoDB, Express.js, React, and Node.js. I am driven by a strong commitment to building dynamic user interfaces and RESTful APIs, exhibiting effective teamwork and problem-solving skills while maintaining a focus on clean, maintainable code. Alongside my technical skills, I am pursuing a B.Tech in Computer Science, which further strengthens my foundation in this field

EXPERIENCE

Full Stack Developer

TeachingHub

📅 03/2024 - 04/2024　📍 Gwalior

An educational platform focused on teaching web development

- Developed end-to-end web applications using the MERN stack
- Focused on implementing REST APIs, user authentication, and deployment
- Practiced SEO and collaborated in agile team environments

Trainer (Front-End & DSA)

TeachingHub

📅 12/2023 - 02/2024　📍 Gwalior

An educational platform focused on teaching web development

- Taught front-end development (HTML, CSS, JS) and data structures
- Conducted interactive sessions and guided students on mini-projects

Frontend Developer Intern

TeachingHub

📅 08/2023 - 10/2023　📍 Gwalior

An educational platform focused on teaching web development

- Built responsive websites with HTML, CSS, and JavaScript
- Worked on optimizing UI/UX and component reusability

EDUCATION

Diploma in Computer Science

Dr. B.R.A. Polytechnic College

📅 08/2019 - 06/2022　📍 Gwalior

Bachelor of Technology in Computer Science

IPS College of Technology and Management

📅 08/2022 - 05/2025　📍 Gwalior

KEY ACHIEVEMENTS

🏳 **Significant Projects**

Successfully developed and deployed complex web applications using the MERN stack, demonstrating strong problem-solving skills and teamwork

SKILLS

Agile　Bootstrap　Canva　CSS

Data Structures　ES6　Git

GitHub　HTML　JavaScript

JWT　MongoDB　React　REST

SEO　SQL　Tailwind

Visual Studio Code　Node.js

Express.js　Gmail　ES6+

PROJECTS

Inventory Management System

📅 01/2024 - 03/2024

A comprehensive inventory management system built on the MERN stack

- Role-based system with item CRUD, request workflows, and JWT auth

Research Paper Review System

📅 01/2024 - 03/2024

A platform designed for researchers to review papers with various roles

- Multi-role platform with submission, feedback, and approval flows

Book Store App

📅 01/2024 - 03/2024

An application for book cataloging and user management

- Authentication, book catalog, and MongoDB integration

PROJECTS

Event Gallery

📅 01/2024 - 03/2024

A photo-sharing platform allowing users to
share images securely

- Secure photo-sharing system with
  collaboration features

News Web App

📅 01/2024 - 03/2024

A news application that integrates live news
from various sources

- Live news via API with responsive UI using
  React and Bootstrap

INTERESTS

Coding Challenges & Hackathons

Active involvement in coding challenges,
hackathons, and building personal
projects
